

Jawad Mansoor

Pakistan | +92 315 7263823 | jawadm.dev@gmail.com | github.com/Jawadyyy

EDUCATION

Air University

Bachelor of Science in Computer Science

CGPA: 3.53 | 6th Semester

Islamabad, Pakistan

2023 – 2027

SKILLS

Mobile Development: Flutter (Dart), Firebase, Supabase, Agora SDK, Google Maps API, REST API Integration

State Management: Riverpod, Provider, GetX

Tools: Android Studio, VS Code, Postman, Figma, GitHub

Languages: Dart, SQL, Python

EXPERIENCE

The Tuitionist

Junior Flutter Developer — Internship

Pakistan

July 2025 – September 2025

- Refactored Firebase architecture during initial development, reducing read/write operations by 30–40% and improving database efficiency.
- Developed and enhanced 5+ core course marketplace features including listing, purchasing, and selling workflows using Flutter and Firebase.
- Designed responsive UI for a live-streaming style application across 6+ screens, managing complex layouts and real-time UI updates.
- Implemented Firebase-backed real-time chat and user profiles enabling secure messaging for hundreds of active users.

Apex AppWorks

Junior Flutter Developer — Internship

Pakistan

June 2024 – September 2024

- Built secure authentication flow and responsive UI for Orcary using Flutter and Firebase, reducing login failure rate by 25%.
- Developed game modules with smooth animations and real-time betting logic, improving feature load times by 30%.
- Created Figma UI mockups and design systems for 6+ app screens including user profile views for a live-streaming platform.

PROJECTS

LifeLine — Emergency Medical Assistance App

Flutter, Firebase, Google Maps API, AI Risk Assessment

github.com/Jawadyyy

- Built an emergency assistance app with SMS/call shortcuts and real-time location sharing via Google Maps API.
- Integrated AI-driven risk assessment and alert system using Firebase backend to improve emergency response efficiency.

Live — Real-Time Voice & Video App

Flutter, Agora SDK, Supabase, Firebase

github.com/Jawadyyy

- Developed low-latency voice and video calling using Agora SDK with stable connection handling across devices.
- Implemented OTP-based authentication and user management via Supabase including email verification workflows.
- Designed real-time interaction features with Firebase/Supabase-backed data handling for seamless communication.
